Oracle Product Strategy

## Safe Harbor Statement

The following is intended to outline our general product direction. It is intended for information purposes only, and may not be incorporated into any contract. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decision. The development, release, and timing of any features or functionality described for Oracle's products remains at the sole discretion of Oracle.

# Asset Management At-a-Glance

- Finance Strategy**
  - Plan current and future investments
  - Track costs and cash flow
  - Analyze asset value / ownership
- Maintenance Strategy**
  - Plan and manage maintenance activities, equipment and materials
  - Track asset history
  - Analyze performance
- Operating Strategy**
  - Manage production / operating schedules and asset availability
  - Monitor the condition and status of assets

# Types of Assets

## Fixed Plant

- Productive machinery
- Equipment
- Components

## Linear / Continuous

- Roadways
- Pipelines
- Transmission lines
- Railway lines

## Mobile

- Trucks
- Buses
- Automobiles
- Rolling stock

## Infrastructure

- Buildings
- Retail stores
- Universities
- Hospitals

# A Need for Change

*Leading Business Trends*

- Reliability Centered Maintenance for High Utilization
- Integrated Predictive Maintenance & Ops Scheduling
- Proactive Workplace Safety & Regulatory Compliance
- Enterprise Management of Spare Parts & Equipment
- Automated Procedure and Maintenance Logs

## What Customers are Saying...

“We use Oracle to coordinate our maintenance activities. We selected Oracle based on fit for functionality, its global scope, and ease of integration. eAM is used as the communications tool for our maintenance department. We communicate what maintenance work we are going to do through work orders and we track our performance against those commitments.”

-- Doug Stretton, Global Maintenance Leader

“Oracle Applications are key to our strategy for maximizing equipment capacity, increasing productivity, decreasing maintenance costs, and improving health and safety across all our real estate and manufacturing operations.”

-- Majid Saif Al Ghurair, CEO

# A Few More Customers...

# Oracle Enterprise Asset Management

---

*Enables you to...*

- 1 Replace Standalone Maintenance Mgmt Systems**
- 2 Perform Maintenance in a Distributed, Mobile, Global Environment**
- 3 Manage the Full Asset Lifecycle**
- 4 Support Compliance and Corporate Governance**
- 5 Place Systems in the Hands of Maintenance Techs**

---

**ORACLE**

CONFIDENTIAL: All capabilities and dates are for planning purposes only and may not be used in any contract

# Traditional Asset Maintenance

Maintain Integration, Not Assets

## ERP Applications

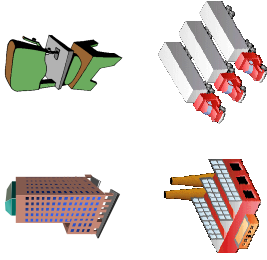

- General Ledger
- Procurement
- Inventory
- Projects
- ~~Documents~~
- ~~Workflow~~
- ~~APIs~~

- Custom Interface
- Custom Interface
- Custom Interface
- Custom Interface

## 3rd Party Providers

- Documents
- Workflow
- CMS Interfaces

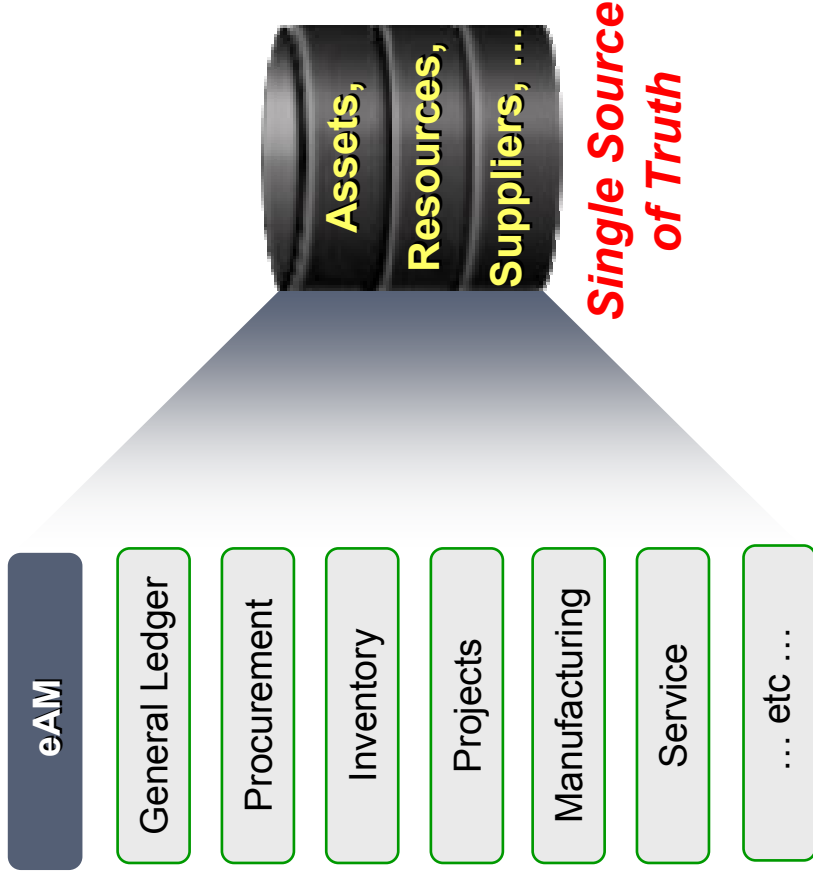

**Computerized Maintenance Management System (CMMS)**

# Foundation: Common Data Model

Eliminate Cost and Complexity of Multi-Vendor Systems

## ERP Applications

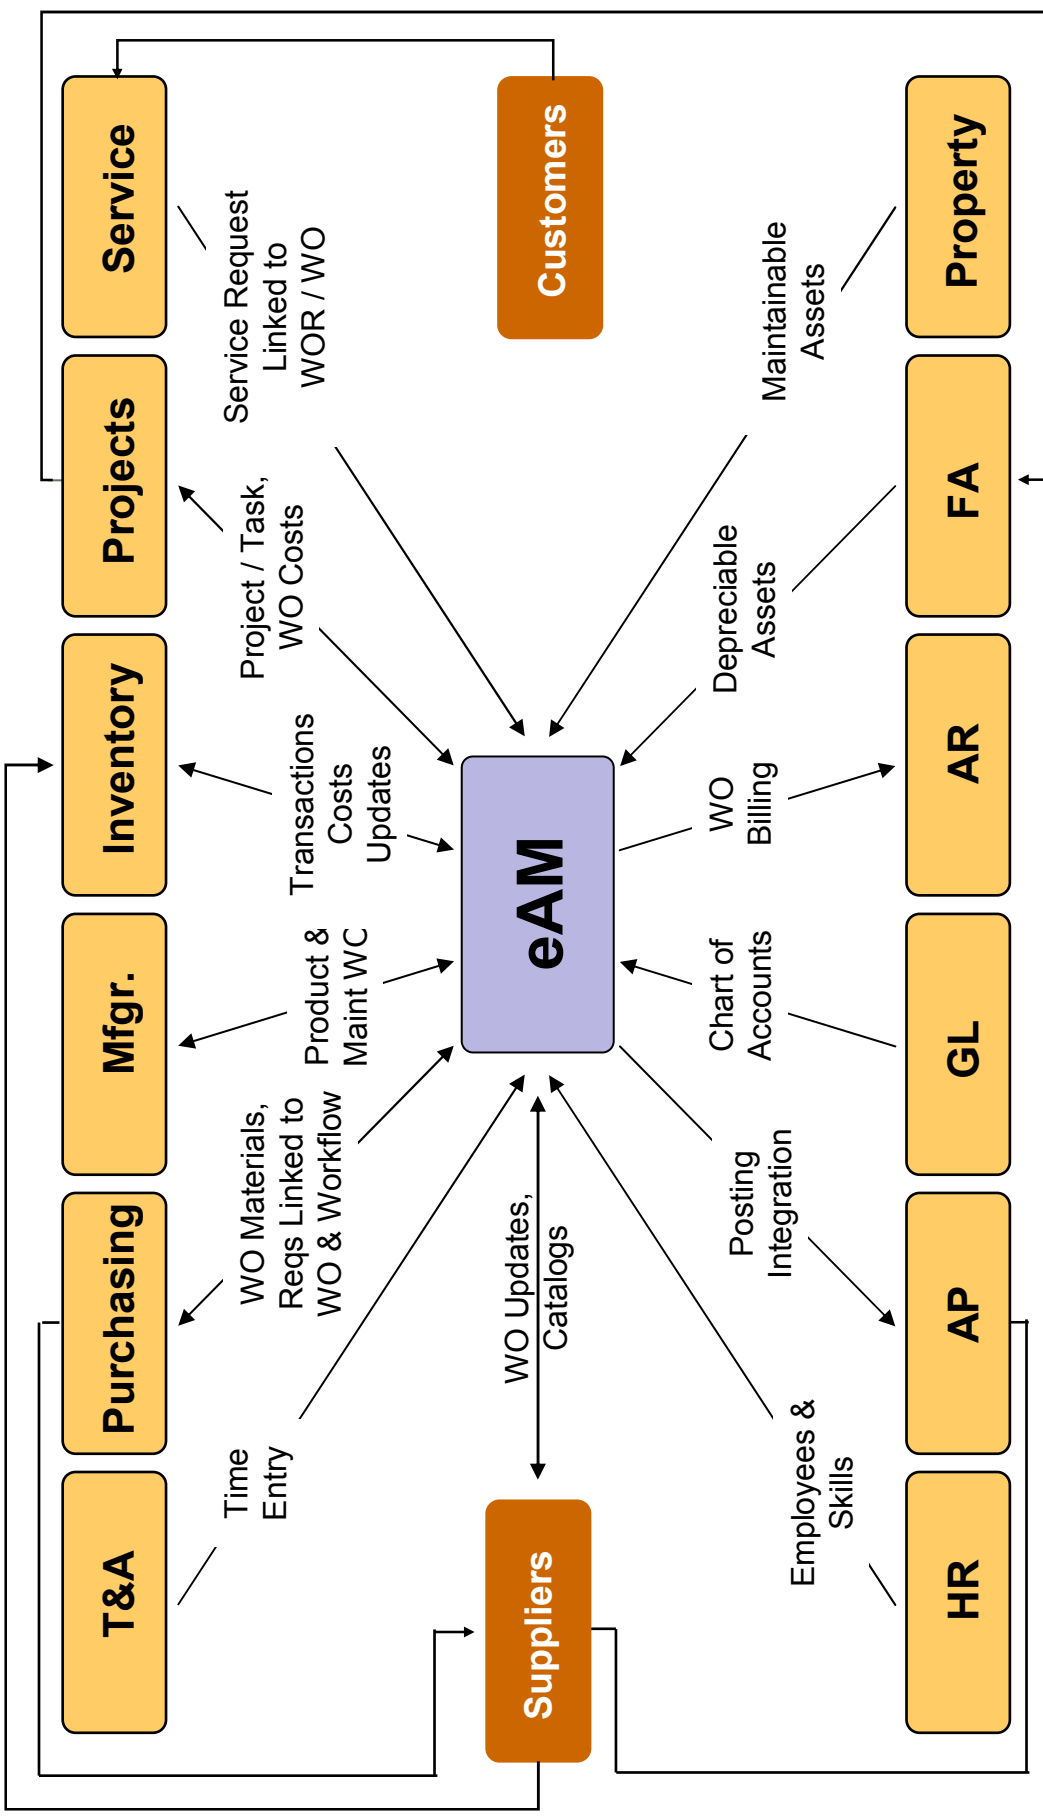

- Reduce information latency and synchronization issues
- Minimize implementation time and cost
- Decrease maintenance and upgrade cost
- Scale to meet growth demands

# Oracle Strategy

## Out-of-the-box Integration

59 integration points - \$3.75M Build + \$885K Annual Maintenance (Gartner)

# Oracle Enterprise Asset Management

---

*Enables you to...*

- 1 **Replace Standalone Maintenance Mgmt Systems**
- 2 **Perform Maintenance in a Distributed, Mobile, Global Environment**
- 3 **Manage the Full Asset Lifecycle**
- 4 **Support Compliance and Corporate Governance**
- 5 **Place Systems in the Hands of Maintenance Techs**

---

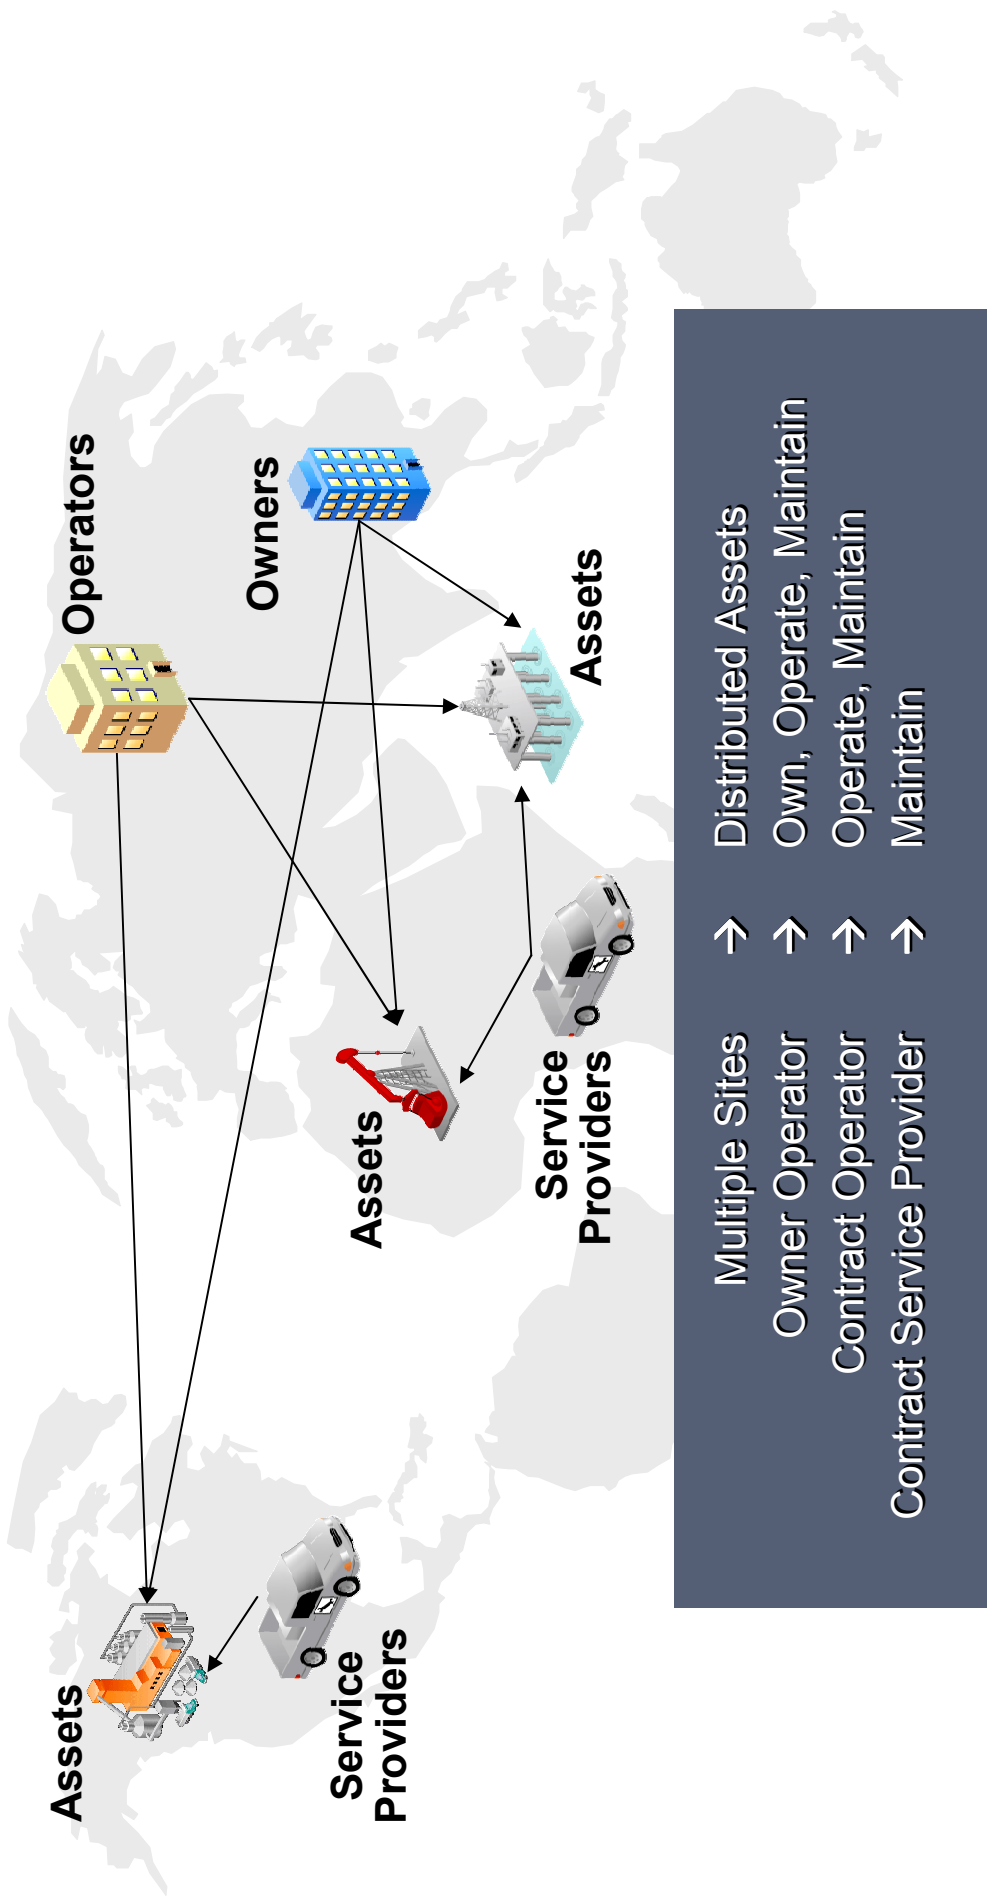

**ORACLE**

CONFIDENTIAL: All capabilities and dates are for planning purposes only and may not be used in any contract

# Distributed, Mobile, Global Assets

*Traditional Org, Business & Geographic Relationships are Changing*

- Multiple Sites → Distributed Assets
- Owner Operator → Own, Operate, Maintain
- Contract Operator → Operate, Maintain
- Contract Service Provider → Maintain

# Real-Time Asset Management

Move from Reactive to Condition-Based Maintenance

Source: PWC Best Practices for Asset Intensive Industries

# Multiple Maintenance Strategies

Plan Maintenance and Repairs in Any Environment

Condition Based

**Condition Monitoring**  
Temp, Flow Rate, Wear, Vibration, Calibration

**System Identification of Limit Violations**

**Workflow-Driven System Action**

- Notify Asset Owner
- Generate Work Order

Preventive

**Planned Usage**  
Planned Calendar Events, Production Forecast

**Actual Usage**  
APIs to Monitoring Systems / Multiple Meters

**Estimated Life**  
Run to Failure, Planned breakdowns

**Maintenance Schedules**

- Auto-Creates Work
- Seasonal & Alternative Strategies

**Maintenance Forecast**

- Real-Time, Recommended Forecast Based on Plans, Estimates, and Actual Usage
- Dynamic Plan Adjustments

Reactive

**Maintenance Request**  
Equipment Failure, Inspection Readings

**Unplanned Maint Scheduling**

- Auto or Manual Work Request Approval

**Operator Initiated WO Req / Approval**

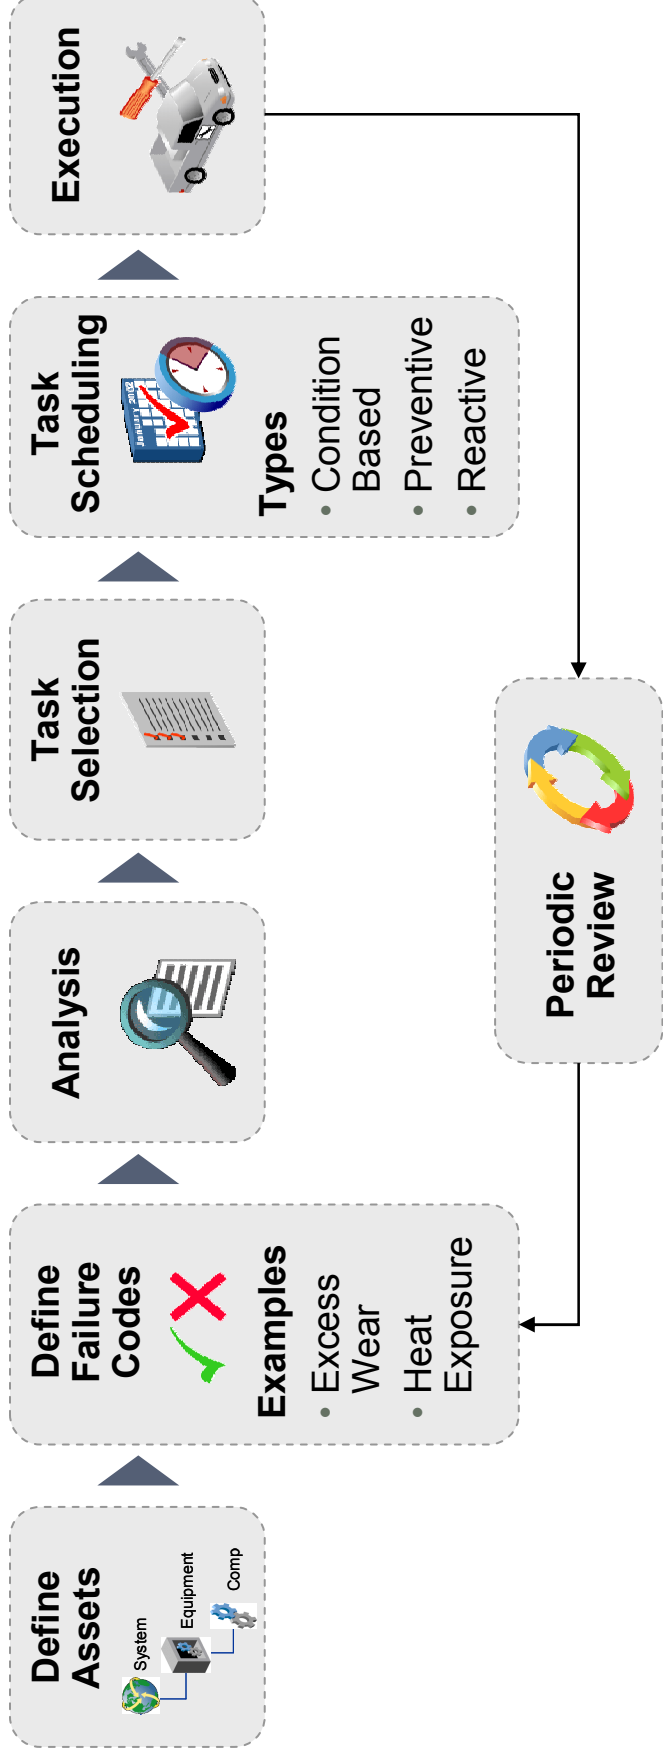

- Notify Asset Owner
- Generate Work Order

# Reliability-Centered Maintenance

*Increase Productivity, Reduce Cost, Improve Product Quality*

- **Focus attention and resources on “most important” assets**

- Preventive or Condition-Based for high value and critical
- Reactive for low value, low priority

- **Select and implement strategy based on asset type and primary usage**

# Oracle Enterprise Asset Management

---

*Enables you to...*

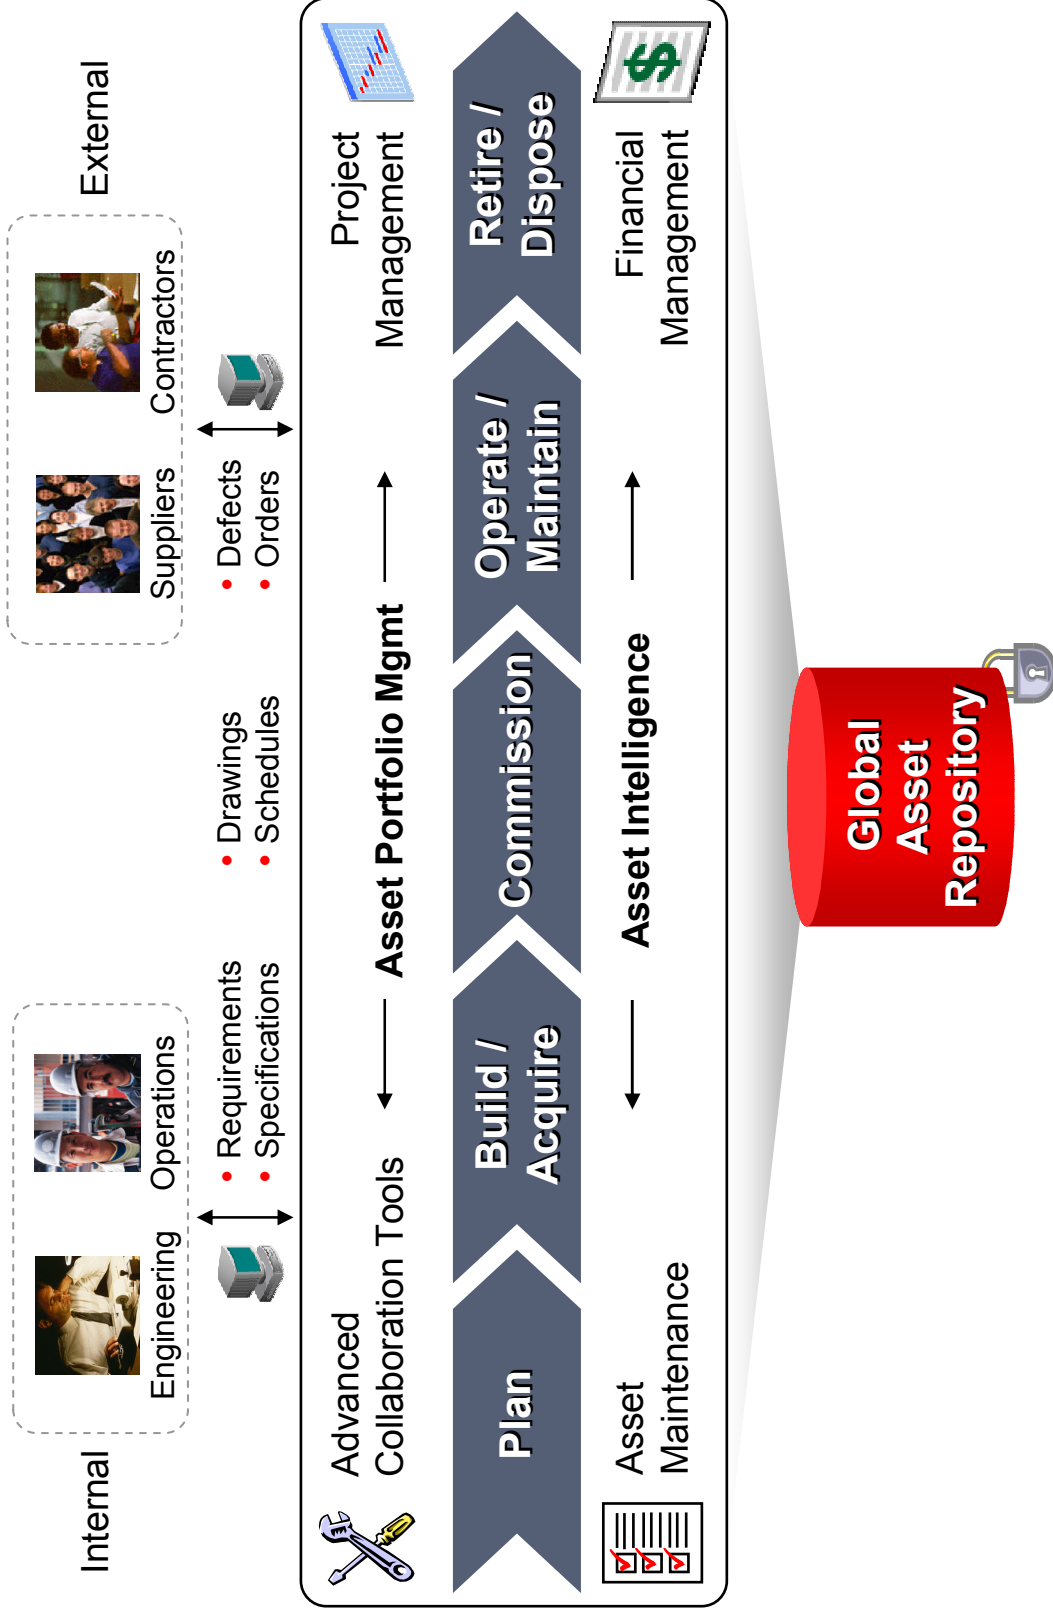

- ① **Replace Standalone Maintenance Mgmt Systems**
- ② **Perform Maintenance in a Distributed, Mobile, Global Environment**
- ③ **Manage the Full Asset Lifecycle**
- ④ **Support Compliance and Corporate Governance**
- ⑤ **Place Systems in the Hands of Maintenance Techs**

---

**ORACLE**

CONFIDENTIAL: All capabilities and dates are for planning purposes only and may not be used in any contract

# Asset Lifecycle Management

# Oracle Enterprise Asset Management

---

*Enables you to...*

- ① **Replace Standalone Maintenance Mgmt Systems**
- ② **Perform Maintenance in a Distributed, Mobile, Global Environment**
- ③ **Manage the Full Asset Lifecycle**
- ④ **Support Compliance and Corporate Governance**
- ⑤ **Place Systems in the Hands of Maintenance Techs**

---

**ORACLE**

CONFIDENTIAL: All capabilities and dates are for planning purposes only and may not be used in any contract

# Define and Track Standard Procedures

*Comply with Regulatory and Safety Requirements*

## Structured Definition

- **Define SOPs and Required Documentation**
  - Procedures (e.g., safety, hazardous material)
  - Dependent task planning (e.g., Tag out)
  - Specifications / drawings
  - Special handling
- **Manage Work Order Execution**
  - Automatically create audit trail and electronic history
- **Skills Selection**
  - Search and select by technician certifications or competencies

## Benefits

- **Equipment Technicians to Perform Quality Work, on Time and Within Guidelines**
  - Minimize time to locate required documentation
  - Reduce incident rate
  - Decrease work order errors
  - Ensure optimal repair work
- **Monitor & Audit Compliance**
  - Avoid fines and reduce non-compliance risk
- **Assign Qualified or Certified Technicians to Tasks**

# Asset Management Intelligence

Timely, Accurate, Relevant

- Daily updates on key performance indicators
- Actionable information on savings and incremental revenue opportunities
- At a glance:
  - Work order status (open and past due)
  - Asset downtime
  - Actual costs

The screenshot displays the Oracle Maintenance Management KPIs dashboard. It features a navigation bar with 'Home' and 'Logout' options, and a 'Views' dropdown menu. The main content area is divided into several sections:

- Flexible Time Periods:** A section with a 'Compare To' dropdown set to 'Prior Period' and a 'Currency' dropdown set to 'USD'. A red callout box labeled 'Flexible Time Periods' points to this area.
- Flexible Comparisons:** A section with a 'Compare To' dropdown set to 'Prior Period' and a 'Currency' dropdown set to 'USD'. A red callout box labeled 'Flexible Comparisons' points to this area.
- Real-Time Results:** A section with a 'Compare To' dropdown set to 'Prior Period' and a 'Currency' dropdown set to 'USD'. A red callout box labeled 'Real-Time Results' points to this area.
- Performance Measures:** A section with a 'Compare To' dropdown set to 'Prior Period' and a 'Currency' dropdown set to 'USD'. A red callout box labeled 'Performance Measures' points to this area.
- Links:** A section with a 'Compare To' dropdown set to 'Prior Period' and a 'Currency' dropdown set to 'USD'. A red callout box labeled 'Links' points to this area.
- Reports:** A section with a 'Compare To' dropdown set to 'Prior Period' and a 'Currency' dropdown set to 'USD'. A red callout box labeled 'Reports' points to this area.
- Graphs:** A section with a 'Compare To' dropdown set to 'Prior Period' and a 'Currency' dropdown set to 'USD'. A red callout box labeled 'Graphs' points to this area.

The dashboard includes several data tables and charts:

- Maintenance Management KPIs Table:**

Name	Value	Change
Work Order Cost	105.4	26.8
Asset Downtime (Hours)	39	178.6%
Completed Work Orders	0.0%	0.0
Late to Schedule Completion %	2	0.0%
Work Order Backlog	250.0%	100.0
Past Due to Schedule %		
Request to Completion (Days)		
- Work Order Cost Trend Table:**

Assigned Department	Actual Cost	Change
Prd Maint(EM1)	6,025	---
F-Maint(EM1)	5,517	---
Prod Maint(EM2)	3,390	552.7%
Garage (FAC)	1,906	252.4%
HQ-Ops (FAC)	1,596	-17.8%
W-Maint(EM1)	889	---
Whse-Maint(EM2)	293	174.8%
FLT Maint(EM2)	91	30.4%
<b>Grand Total</b>	<b>19,706</b>	<b>490.6%</b>
- Asset Downtime Trend Table:**

Department	Downtime (Hours)	Change
F-Maint(EM1)	20.5	20.5
Construct(FAC)	20.0	0.0
Whse-Maint(EM2)	19.1	13.1
Garage (FAC)	16.3	16.0
HQ-Ops (FAC)	9.0	-12.2
Prod Maint(EM2)	8.0	-18.3
Prd Maint(EM1)	6.0	4.1
W-Maint(EM1)	4.6	3.6
FLT Maint(EM2)	2.0	0.0
<b>Grand Total</b>	<b>105.4</b>	<b>26.8</b>

## Self-Service Access

*Provide Maintenance Workers Easy System Access*

- Remote access via web browser
- Capture information at the source
- Perform step-by-step transactions
- Require minimal system training
- Reduce time to input information
- Decrease errors in data transfer
- Reduce clerical labor

# Maintenance User Workbench

Enable Personalized Role-Based Access

Easy to use, personalized HTML user interface

Personal KPIs

The screenshot displays the Oracle Maintenance User Workbench interface. At the top, it shows the user is logged in as 'Moll, Joe'. Below this, 'Key Indicators' are listed: 'Today's Work 3 (0.0 hr.)', 'Overdue Work 0 (0.0 hr.)', and 'Open Work 3 (0.0 hr.)'. A 'Checked Out Assets 1' section is also visible. The main area features a search bar with filters for 'Department' (HQ-Ops) and 'Asset Number'. A 'View By' dropdown is set to 'Open Work'. Below the search bar, there are tabs for 'Create Work Order', 'Create Work Request', 'Mass Time Entry', and 'Crew Schedule'. A table of work orders is displayed with columns for 'Work Order', 'Op Description', 'Start Date', 'Due Date', 'Priority', 'Asset Number', 'Attachments', 'Op Charge Time', and 'Complete Assign Operation Employee'. Three work orders are listed, each with a 'Show' link and a green plus icon for attachments.

Work Order	Op Description	Start Date	Due Date	Priority	Asset Number	Attachments	Op Charge Time	Complete Assign Operation Employee
Show WO243745	Default 10 Operation for Work Order	20-Nov-2006 10:20:00	20-Nov-2006 10:20:00	Emergency	HVAC-8100-Unit 1	+		
Show WO243746	20 Balance Air	20-Nov-2006 11:11:00	20-Nov-2006 11:11:00		HVAC - 8100	+		
Show WO243747	11 Calibrate TSTAT	20-Nov-2006 11:39						

Immediate access to employee's current, past due and future work assignments

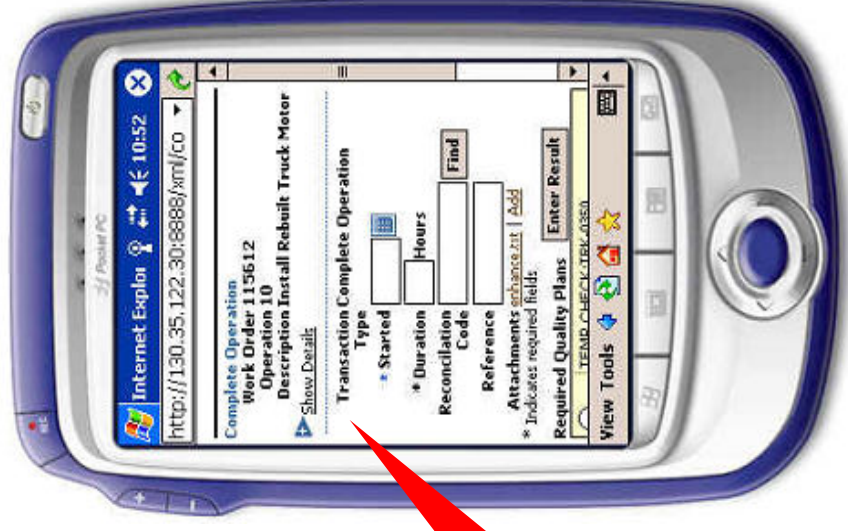

Direct access to key processes (e.g., meter / quality reading entry, material request, asset details)

- Employees view assigned work & self-assign work
- Issue materials, record labor, and report completion from single self service portal
- Provide workers access to performance measurements

# Mobile Maintenance User Workbench *Remote Access to Work Assignments, Details, and Transactions*

Employees view assigned work & self-assign work

Issue materials, record labor, and report completion from self-service portal

- ✓ Operates on any browser-based device
- ✓ Real-time data transfer versus periodic desktop hot-sync

# Oracle Enterprise Asset Management

Replace Standalone Maintenance Management Systems

---

Perform Maintenance in a Distributed, Mobile, Global Environment

---

Manage the Full Asset Lifecycle

---

Support Standards Compliance & Corporate Governance

---

Place Systems in the Hands of Maintenance Techs

---
