

# Using the New Item Request functionality in the Oracle PLM Item Catalog

## **What is a New Item Request (NIR)?**

- New Item Requests and Oracle Items
- New Item Requests are new part number ECOs
- NIRs are the workflow for collecting data on a new part number before using the part/item in Oracle E-business suite (EBS)
- NIR functionality is available in 11.5.10 and in R12

# How do they work?

- Change request types
- Workflows
- Item Catalog Categories and NIRs
- Item Master (Engineering Items)

# Workflow Templates

- Create specific workflow templates
- Add templates to workflows in PLM
- No workflow developer skills required
