

Customizing Oracle Applications with CUSTOM Library (CUSTOM.pll)

Biju Varghese, University of Virginia

Personal Introduction

Biju Varghese

Application Developer,

Integrated System Deployment & Support,

University Of Virginia.

Email : biju@virginia.edu

Presentation Agenda

- **Current environment at UVA**
- **Pre-Requisites**
- **Overview of CUSTOM.pll**
- **Common Customizations**
- **Events & Triggers Supported**
- **Coding Standards & Restrictions**
- **Case Studies: Customizations from UVA**
- **Troubleshooting CUSTOM.pll code**
- **Tips & Suggestions**
- **Future of Forms & CUSTOM.pll**
- **Q&A**

Current Environment at UVA

- Oracle Applications **11.5.10.CU2**
 - 2001 - **11.0.3**
 - 2004 - **11.5.9 (11i)**
 - 2006 - **11.5.10** upgrade
- Database: **10.2.0.3 (10G Rel2)**
- Modules: **Financials, HR & Payroll**
- O/S: **UNIX - SUN SPARC Solaris 10**

Pre-Requisites

- **Oracle Applications knowledge**
 - **CUSTOM.pll is only for Oracle Apps**
- **Oracle Forms Programming Skills**
 - **Uses Forms Builder – Forms 6i**
 - **Uses Forms Triggers & Functions**
- **PL/SQL Knowledge**

Overview of CUSTOM.PLL

- **What is CUSTOM.pll - Form's attached library – open an Oracle Form**
- **How does it work?**
- **\$AU_TOP/resource – *.pll & *.plx**
- **Beauty of CUSTOM.pll**
 - **Customizing forms without modifying it (*.fmb)**
 - **Customizations are protected from Oracle Patch.**

Common Customizations

- **Disabling fields/blocks based on conditions or special business logic**
- **Hiding DFF and confidential data**
- **Defaulting or copying values to a field based on a custom logic**
- **Enabling Zoom icon**
- **Adding custom validations and error messages**
- **Changing Forms behavior for different responsibilities**

Events & Triggers supported in CUSTOM.pll

- **WHEN-NEW-FORM-INSTANCE**
- **WHEN-NEW-BLOCK-INSTANCE**
- **WHEN-NEW-RECORD-INSTANCE**
- **WHEN-NEW-ITEM-INSTANCE**
- **WHEN-VALIDATE-RECORD**
- **ZOOM**

Triggers in CUSTOM.pll (cont'd)

- How these triggers are executed on the form ?
- How to find the right trigger ?
- Display events from CUSTOM.pll
 - Help->Diagnostics->Custom Code->Show Custom Events
 - Used in debugging custom.pll code
- Order of precedence – Form->CUSTOM.pll
- Sample trigger logic in CUSTOM.pll

Oracle Application Form

Award Management Folder

Award Management

Number: **GG10002** Template Funding Source Name: **U.S. Nih Deafness & O**

Short Name: **MD-PEDT Blanton DEA** Funding Source Award Number: **521163/p355807**

Full Name: **Genetic Studies of Non-Syndrom** Pre-Award Date:

Start Date: **01-JUL-2000** End Date: **30-JUN-2001**

Close Date: **30-SEP-2001** Award Type: **G&C-Contract, Cost Re**

Purpose: **2040-20 Current Fund** Status: **Closed**

Organization: **41070 MD-PEDT Genet** Funded Amount: **24,655.00**

Award Amount: **24,655.00** Hard Limit

Funding Summary [..2]

Installments Terms and Conditions Budgetary Control Funding Source Details Contacts Personnel

Number	Issue Date	Type	Description	Active	Billable	[]
001	01-JUL-2000	Award	GTD Conversion	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	[]
				<input type="checkbox"/>	<input type="checkbox"/>	[]
				<input type="checkbox"/>	<input type="checkbox"/>	[]

Reports Project Funding

start 2 W... 2 M... Inb... Mic... isp... Ora... Unt... 3 I... 6:10 PM

Sample code from custom.pll

```

procedure event(event_name varchar2) is

    form_name    varchar2(30) := name_in('system.current_form');
    block_name   varchar2(30) := name_in('system.cursor_block');

begin
    if (event_name = 'ZOOM') then
        if (form_name = 'DEMXXEOR' and block_name = 'ORDERS') then
            .....
        elsif (event_name = 'WHEN-VALIDATE-RECORD') then
            if (form_name = 'APXVENDR') then
                if (block_name = 'VENDOR') then
                    copy(upper(name_in('VENDOR.NAME')), 'VENDOR.NAME');

                end if;
            end if;
        else
            null;
        end if;
    end event;

```

Coding Standards and Restrictions

- Cannot use SQL, but can call PL/SQL function.
- Copy command instead of Assignment operator
- `fnd_message.set_string` & `fnd_message.error`
- `fnd_message.set_name('UVA','uva_msg')`
`fnd_message.error`
- Use `app_item_property` instead of `set_item_property` ()
- Cannot create blocks & items ,but can modify the properties.

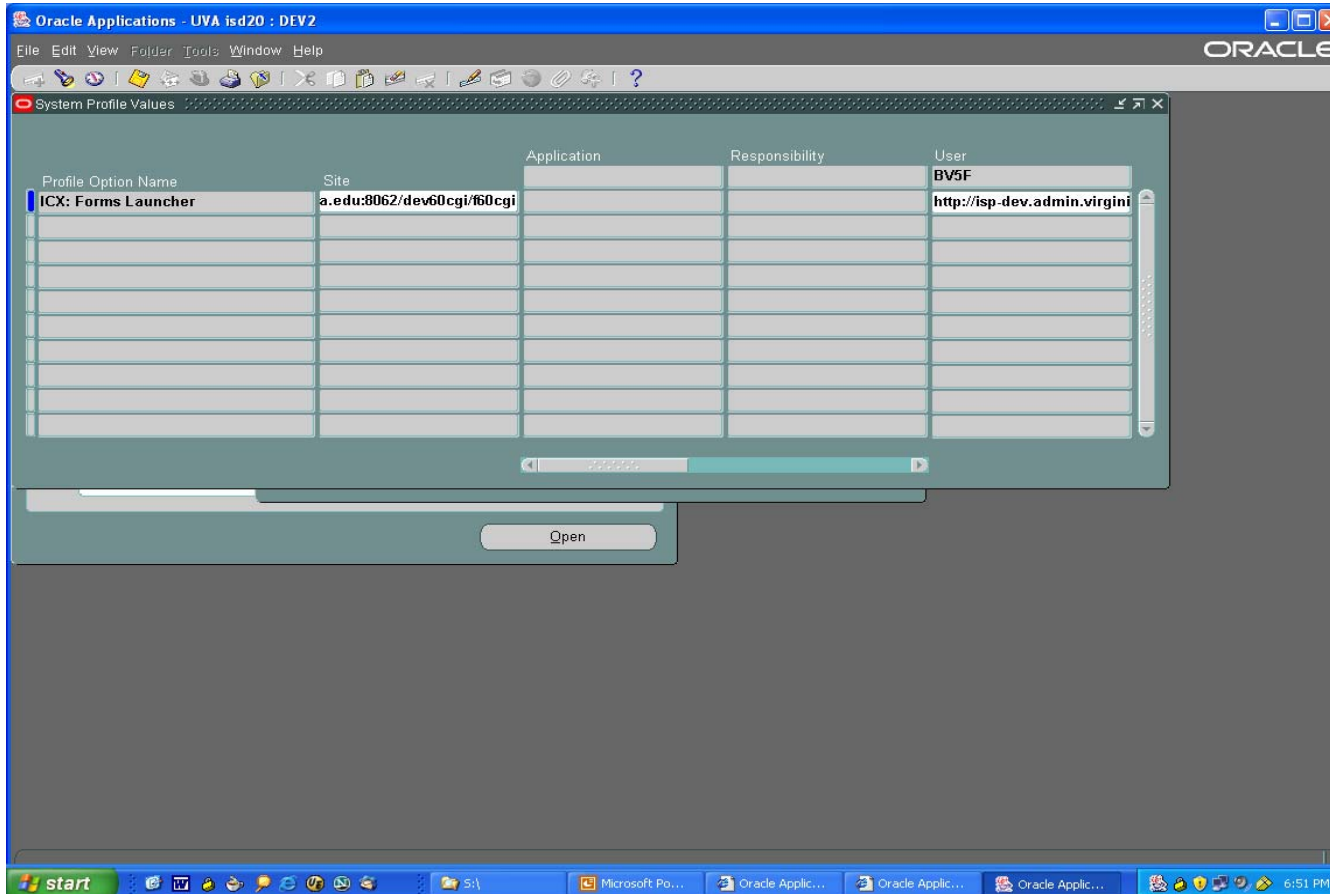

Case Studies: UVA Customizations

- **Enable ZOOM icon – Purchasing Form.**
- **HR Confidential Data hiding - Hide data based on responsibility**
- **HR Override Tax Address - Defaulting local City address.**
- **GMS - Workflow kicks off after Project funding in Awards form.**
- **HR Salary approval - Single line of code, but more research in forms**

Troubleshooting CUSTOM.pll code

- Exception handling for each event and PL/SQL package calls.
- Error messages: `fnd_message.debug` – Quick
- Disabling Custom.pll code(Help -> Diagnostics -> Custom Code -> Off)
- Show Custom events (Help -> Diagnostics -> Custom Code -> Show Custom events)
- Forms Run-time Diagnostics (FRD)
 - Assign value to Profile 'ICX: Forms Launcher'
`/dev60cgi/f60cgi?record=all&log=/tmp/uva_frd.log`
 - `$FORMS60_TRACE_PATH` -> `uva_frd.log`

Profile: ICX: Forms Launcher

Tips & Suggestions

- **How to avoid hard coded values ?**
 - **Create Profiles and read values using PL/SQL.**
 - **Profiles can be managed by functional people.**
- **What if Oracle overrides your CUSTOM.pll logic ?**
 - **Go to the next inner level Event(block-> item)**
 - **Open Oracle form and find out their logic and bypass it with special logic.**
- **Divide CUSTOM.pll by modules (Ex: UVAHR.pll)**
- **Always test CUSTOM.pll customizations after major upgrade or mega patches.**

Reading Profile values

```
FUNCTION get_applicant_profile_value (p_resp_id IN NUMBER)
RETURN VARCHAR2
... SELECT profile_option_value
      INTO l_profile_option_value
      FROM fnd_profile_option_values
      WHERE profile_option_id IN (
          SELECT profile_option_id
            FROM fnd_profile_options
           WHERE profile_option_name = 'UVA_HR_APPL_ACCESS'
             AND TRUNC (SYSDATE) >= start_date_active
             AND TRUNC (SYSDATE) < NVL (end_date_active, c_eternity))
      AND level_id = 10003
      AND level_value = p_resp_id;
EXCEPTION
....
END;
RETURN l_profile_option_value; ...
```

Future of Forms & CUSTOM.pll

- **Forms (*.fmb) -> OA Framework Pages (JAVA objects)**
- **Custom.pll -> Page Personalization**
- **OA Framework Customizations**
- **Apps Rel 12 & Fusion.**

Questions?

Thank You
