

How Oracle Learning and Talent Management Work Together

Kim Flannagan, USi

Wednesday, April 16, 2008

11:00 AM-12:00 PM

304

Attendees will learn how Oracle Learning Management (OLM) enables an organization to achieve the highest levels of productivity and success through education and training of their employees. OLM is tightly integrated with talent management functions within the HR application which allows you to track competencies achieved by the learner upon completion of training. Career Path development, recruitment and succession planning are all part of the offering.
