

Discoverer 10g Tips & Tricks for Developing and Maintaining Reports

Objective:

- Learn how to create reports using Discoverer 10g
- Understanding report layouts, formats, conditions, and calculations
- What is an EUL and what does it do?
- Managing report security and sharing reports
- Develop a standard to manage the number of reports

Abstract (520 char. Or less)

Discoverer comes with the E-business suite so take advantage of a great ad hoc reporting tool. Power users will be able to develop complex reporting needs while even a basic user can modify or create simple reports. Learn how to export these reports to excel, html, pdf, etc. This class will cover how to create reports, understand report layouts, format options, create conditions and parameters (prompts), and add calculations. You will also learn how to share reports and manage security. Learn what an EUL is and what it does.
