Subject: Session ID 2145553191 - Collaborate '08

Re: "Manage your Outside Assembly Processes with "Chargeable Subcontracting" in Oracle EBS", with session ID 2145553191

Greetings -

The status of my presentation submission for Collaborate '08 was updated from "Alternate" to "Accepted" last week (thank you!). I have every intention to fulfill my presentation obligation, but am having trouble being able to meet the February 29 for submission of a completed white paper and Power Point, for the following reasons:

-> I have been diligently working to resolve technical difficulties with my Release 12 demo instance, upon which I am depending to create explanatory screen shots for my paper and presentation.

-> This past week since I was informed of acceptance of my presentation has been extraordinarily busy, leaving little time available to develop the presentation materials. When I saw the OAUG email on 1/31 listing the abstracts for Collaborate '08, I saw my submission wasn't listed and thought that the list was finalized, so I did not work on presentations materials after that time until my presentation was finally accepted last week.

I will upload the draft materials I have on February 29, but they will be far from complete. I anticipate having the necessary time to devote, and to remitting finished presentation materials on or before March 14, 2008.

Would this extension be acceptable to OAUG?

Thanks for you understanding.
